Laurel Wilt Disease
http://www.ncforestservice.gov/forest_health/forest_health_laurelwiltfaq.htm

Thousand Cankers Disease
http://ncforestservice.gov/forest_health/forest_health_thousandcankers.htm

The devastating pests above are likely to be brought into or moved around North Carolina in or on firewood. The use of local or treated firewood is an important factor in preventing the spread of potentially devastating invasive species in our state's forests. Please keep this in mind as you prepare for your outdoor recreation activities.

The N.C. Forest Service asks that you please use local firewood.
