   Certified Burner: Yes

Points to Consider:
- Does contractor have insurance?
- Is contractor a North Carolina Certified Burner?
- Can contractor provide a list of those for whom they have burned so that you can contact them for references?
- Is the contractor familiar with the smoke management guidelines and air quality laws?
- Ask for a contract, read it, sign it, and keep a copy. If you are not sure about something in the contract, ask contractor to explain it.
- When can the contractor get to you? What does their workload look like?

The North Carolina Forest Service will not recommend one contractor over another. The NCFS strongly encourages the use of private burning contractors. The NCFS is limited to certain times of the year for conducting understory burning. Private contractors have more flexibility on timing for the burn. If you have difficulties in obtaining a private contractor, please contact the NCFS for assistance.
