Where are they now?

Monitoring Firewood-Vectored Invasive Forest Pests in North Carolina

These devastating pests are likely to be brought into or moved around North Carolina in or on firewood. The use of local or treated firewood is an important factor in preventing the spread of invasive species in our state's forests.

The N.C. Forest Service asks that you use local firewood to prevent the further spread of forest pests.

Gypsy Moth Quarantine
Emerald Ash Borer
Laurel Wilt Disease
Thousand Cankers Disease
Spotted Lanternfly

These devastating pests are likely to be brought into or moved around North Carolina in or on firewood. The use of local or treated firewood is an important factor in preventing the spread of invasive species in our state's forests.

The N.C. Forest Service asks that you use local firewood to prevent the further spread of forest pests.

Map Created 1/29/2019 by Kelly Oten - FHM Coordinator

The N.C. Forest Service is a division of the N.C. Department of Agriculture and Consumer Services; Steve Troxler, Commissioner.
